PROFESSIONAL SUMMARY

Network and IT Support Engineer with hands-on experience in network management, IT asset management, server maintenance, and troubleshooting across multi-branch environments. Skilled in optimizing IT infrastructure, managing the full hardware lifecycle, and ensuring maximum efficiency, security, and uptime for end users.

TECHNICAL SKILLS

Networking & Infrastructure: Routing & Switching (Cisco), LAN/WAN Support, DHCP, DNS, IP Addressing, FortiGate Firewall Administration, VPN Configuration & Troubleshooting

Systems & Server Administration: Windows Server 2012/2016/2019, Active Directory Domain Services (Users, Groups, OUs), Group Policy Management, NTFS Permissions & File Sharing, Storage Spaces

IT Asset Management: Hardware Inventory & Lifecycle Management, Asset Tagging & Tracking, Deployment & Decommissioning, Warranty & License Tracking, Procurement Support

IT Service Management: Incident Management, Ticketing Systems, SLA Monitoring & Compliance, Escalation Management, Service Requests

Tools & Support: Remote Desktop, AnyDesk, Event Viewer, Antivirus & Data Backup Administration, Biometric Attendance Systems

WORK EXPERIENCE

IT Support Engineer — Das & Partners Consulting Engineering, Abu Dhabi, UAE *Dec 2025 – Present*

- **On-Site & Remote Support:** Delivered on-site and remote IT support across 4 branch offices, ensuring smooth daily operations and minimal downtime.
- **IT Asset Management:** Installed, configured, and maintained desktops, laptops, printers, and network devices, maintaining accurate inventory and hardware records to support the full asset lifecycle from deployment to decommissioning.
- **Troubleshooting:** Diagnosed and resolved issues related to Windows OS, network connectivity, and hardware failures.
- **Active Directory Administration:** Managed users and permissions using Active Directory, including account creation, password resets, and access control.
- **Network Support:** Provided support for LAN/WAN infrastructure, including basic configuration of routers and switches.
- **Remote Access Support:** Supported remote users via Remote Desktop and AnyDesk, and troubleshooted VPN connectivity issues for remote access.
- **Security & Maintenance:** Performed system updates, antivirus checks, and data backups to maintain security and system performance.
- **Ticket & SLA Management:** Managed IT support tickets, prioritizing incidents and service requests based on SLA requirements, ensuring timely resolution and escalation when required.
- **Cross-Department Coordination:** Coordinated directly with users and departments to resolve technical issues efficiently.

Network Engineer Trainee — Turnkey Integrated Technology (TK-IT) *Aug 2025*

- **Routing & Switching:** Trained on Cisco routing and switching fundamentals and network security principles.
- **Firewall Administration:** Gained hands-on exposure to FortiGate firewall administration and configuration.
- **Data Center Technologies:** Studied Cisco Nexus data center technologies and Hyper-Converged Infrastructure (HCI) concepts and deployment.
- **Backup & Disaster Recovery:** Covered backup and disaster recovery solution design and implementation.

- **Domain Administration:** Managed and administered the company's Active Directory domain, including domain join/removal for workstations, Organizational Units (OUs), and Group Policy Objects (GPOs) for security and compliance.
- **Active Directory:** Hands-on experience managing user accounts, permissions, and group policies in Active Directory.
- **Network Services:** Supported core domain network services, including DNS and DHCP, to maintain reliable connectivity and name resolution across the domain.
- **Hardware Support:** Responsible for the maintenance and troubleshooting of desktop and laptop computers.
- **Peripheral Support:** Managed and resolved issues related to printers and scanners.
- **Biometric Systems:** Handled the setup, configuration, and support of fingerprint (biometric) attendance devices.

EDUCATION

BSc. in Information Technology — Minia University, Faculty of Science

Jul 2023

Grade: Very Good

Graduation Project: "Debt Management System" — designed and deployed a centralized database on a live server.

Grade: Excellent

CERTIFICATIONS & COURSES

- ITIL® 4 Foundation – IT Service Management
- CompTIA Network+ – Networking Fundamentals
- CCNA – Cisco Certified Network Associate
- MCSA – Microsoft Certified Solutions Associate

SOFT SKILLS

- Communication
- Problem-Solving
- Teamwork
- Time Management
- Self-Learning
- Collaboration
- Adaptability

LANGUAGES

Arabic: Native

English: Intermediate (good command in writing and speaking)
